General Information

IMPORTANT . . . Be sure to buy at one time sufficient material of the **same dye lot** to complete the article you wish to make, as it is impossible to avoid slight variations in color in different dye lots.

GAUGE . . . Before starting your article, make a small sample of the stitch or motif. If your working tension is too tight or too loose, use a finer or coarser needle to obtain the correct gauge.

BLOCKING DIRECTIONS . . . Following measurements given, with rustproof pins pin article right side down on a well padded flat surface. *If article is too large for pressing table, block in sections of convenient size.* Be sure to pin out all picots, loops, scallops, etc., along outside edges. Press through a damp cloth with a moderately hot iron (do not rest iron on decorative raised stitches). When thoroughly dry, remove pins.

TO LAUNDER COTTON ARTICLES . . . Before laundering, record all important measurements. Launder article in warm water, using a good neutral soap or soap flakes. Allow to dry thoroughly on a flat surface. Then block article, following **Blocking Directions.**

STARCH STIFFENING . . . Starch the article, pin out on a padded surface following original measurements and outline, press through a dry cloth and remove pins when article is dry. The stiffness of the starched article is governed by individual taste. Following directions on packaged starch and experimenting will bring desired results.
